

ECG Clinical Decision-Support Report

City Cardiology Hospital (design preview)

RESEARCH-ONLY

Qualified clinician review required

AUTHORIZED CLINICAL REVIEW RECORD

This report combines the authorized source-recording visualization, a research-only model observation, and clinician-entered documentation. It is intended for qualified clinician review.

PATIENT Demo Patient	MRN CITYCARD-DEMO-0001
EMPI EMPI-DEMO-000001	ECG ACCESSION ECG-DEMO-0001
ENCOUNTER ENC-DEMO-2026-1003	REPORT CLINICIAN Demo Doctor

ECG waveform - source-recording visualization

AI research/CDS observation

AI-GENERATED RESEARCH/CDS OBSERVATION
Prediction: Normal sinus rhythm Uncalibrated model score: 87.4% Model version: local-research-checkpoint
This model-generated result supports qualified clinician review only. It is not an autonomous diagnosis, disease probability, or treatment recommendation.

Clinical review

CLINICIAN ASSESSMENT

Clinician-entered assessment displayed here for layout preview.

CLINICIAN-ENTERED DIAGNOSIS

Clinician-entered observation

Clinician-entered prescription record

The following record is entered by a clinician. It is not generated, selected, or recommended by the AI model.

MEDICINE	DOSE	ROUTE	FREQUENCY	DURATION	INSTRUCTIONS
Clinician-entered item A	As documented	Oral	As documented	As documented	Example table content only - not a treatment recommendation.
Clinician-entered item B	As documented	As documented	As documented	As documented	Longer instructions wrap cleanly within the prescription table.

Research-use notice: RAMNV2 output is an uncalibrated research score. It does not replace independent clinical assessment, diagnosis, treatment planning, or emergency evaluation.
